

How to Gel your Hair

1. Assemble Equipment:

You will need a hair brush / comb, hair ties, assorted pins and clips, a bun net, a flask of hot water, a bowl, sachets of gelatine, a pastry brush, and a small towel to catch any drips!

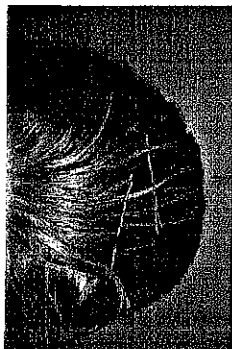

2. Put Hair Into Ponytail:

Make sure the ponytail is quite high up on your head and is as neat as possible.

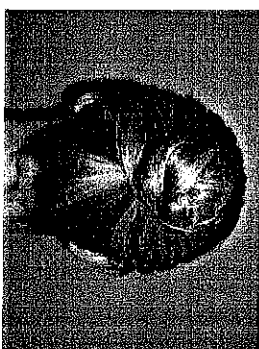

3. Secure any Loose Hair:

Use hair clips to pin back any loose ends. If your hair is too short for a ponytail you will need to clip up the back and sides as well.

4. Make a Bun:

Put your ponytail into a bun, cover with a bun net and pin securely.

5. Make the Gel:

Put some hot water in the bowl, add a couple of sachets of gelatine and mix well. Add enough water to make a syrupy liquid that can be brushed onto the hair with the pastry brush. Make sure all the fine hair at the neck and over the ears is gelled and that the bun is well covered.

6. Pin on the Head Dress:

Make sure it is very secure - and off you go!
